MATCHING COMPETENCIES

PROBLEM SOLVING
Problem-solving is a passion of mine and something I do for fun in my free time. I love puzzles, optimization, and critical thinking and I hone these skills in coding, bouldering, language-learning, gaming, and teaching.

ACCOUNTABILITY
Following-up, taking notes, organizing, and planning are skills that I have developed over many years as a professional. I am known for taking the lead through uncertain territory, acquiring resources, and ensuring proper accounting of time, objectives, and resources.

BROAD EXPERIENCE
Experiences as a client and, a leader and a follower, a freelancer and an employee, have instilled the drive and background to understand all aspects of a project as well as the ability to communicate these aspects to anyone involved.

EDUCATION/COURSES

UDEMY
THE COMPLETE JUNIOR TO SENIOR DEVELOPER ROADMAP
Aug 2020 – present

WHY ME

As a software engineer with experience in web-app development, I have a background that is relevant to all stakeholders, provides me unique insights, the ability to fully understand a project, and work well in a team. My experiences with the Full-stack have given me the tools to build exciting, responsive, and lightning-fast apps. Breaking down complex topics into digestible components is second nature to me and I have gone through the grind of extensive learning again and again.

💼 PROFESSIONAL EXPERIENCE

FREELANCE
Full-Stack Developer
present
   As a freelance developer, I designed and built several different apps of interest for potential use.

The Weather App
github.com/adexy100/Weatherapp
A lightweight React app for displaying the weather information via a user's location, a location's name, or coordinates. The app was designed to showcase a minimalist design with intuitive functionality and responsive styling. In addition to integrating API data, the app made use of the Chart.js library for beautiful and informative graphs. Tools & Methodologies: CSS; Git; HTML; JavaScript; JSON; REST; React.js; Darksky API; Chart.js.

Face-recognition App
github.com/adey100/Face-detection
This app was built as the final project for The Complete Web Developer 2019 course. It is a clean, smooth, and lightweight app that accepts any image URL and returns the same image with outlines around each face in the photo. Tools & Methodologies: CSS; Git; HTML; JavaScript; JSON; PostgreSQL; Node.js; Express; REST; Clarifai API.

Robofriends with Redux
This app was built as the second project for The Complete Web Developer 2019 course. Fetch users' data and search by name. Built with React and Redux.
