MATCHING COMPETENCIES

PROBLEM SOLVING
Problem-solving is a passion of mine and something I do for fun in my free time. I love puzzles, optimization, and critical thinking and I hone these skills in coding, bouldering, language-learning, gaming, and teaching.

ACCOUNTABILITY
Following-up, taking notes, organizing, and planning are skills that I have developed over many years as a professional. I am known for taking the lead through uncertain territory, acquiring resources, and ensuring proper accounting of time, objectives, and resources.

BROAD EXPERIENCE
Experiences as a client and, a leader and a follower, a freelancer and an employee, have instilled the drive and background to understand all aspects of a project as well as the ability to communicate these aspects to anyone involved.

WHY ME

As a full-stack developer with experience in web and mobile app development, I have a background that is relevant to all stakeholders, provides me unique insights, the ability to fully understand a project, and work well in a team. My experiences with the MERN stack have given me the tools to build exciting, responsive, and lightning-fast apps. Breaking down complex topics into digestible components is second nature to me and I have gone through the grind of extensive learning again and again.
